

Trisha Ramraj

Senior Scientist, SAMRC

Project Management

QUALIFICATIONS

Masters in Public Health

BIOSKETCH

Trisha Ramraj is a Senior Scientist at the South African Medical Research Councils HIV and other Infectious Diseases Research Unit.

She has extensive experience in clinical research and project management, with a focus on maternal and child health, HIV prevention, and prevention of mother-to-child transmission.

Over the past 19 years, Ms Ramraj has developed substantial expertise in research project management, including study planning and implementation, operational coordination, regulatory and ethics compliance, quality management, data management, monitoring and evaluation, scientific writing and stakeholder engagement.

She has successfully coordinated multidisciplinary research teams and supported the delivery of complex studies from protocol development through study close-out, ensuring compliance with Good Clinical Practice, sponsor requirements, and national and international regulatory standards.

She has contributed to several multicentre clinical trials and public health studies and currently serves as Project Manager for the PedMAb1-Ex clinical trial.

Within the STEAM-3D project, Ms Ramraj will provide project management support, assisting with project activities, monitoring deliverables and timelines and contributing to the successful implementation of project objectives across participating institutions.

STEAM-3D

Sustainable Training in Epidemiological Analysis and Modelling
for Data-Driven Decision Making in Africa
